SUMMARY

Computer Science undergraduate (B.Tech CSE, AI/ML; CGPA 8.06) seeking a Full-Stack / Software Engineer role. Built and deployed MERN-stack applications featuring JWT authentication, RESTful APIs, and Gemini LLM integration, including a GenAI resume screener that evaluates candidates across 4 input formats. Selected among 250+ teams for the Samartha National Hackathon's 36-hour onsite finals. Strong foundation in data structures, databases, and operating systems.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, C, C++
Frameworks: Express.js, Next.js, React, Spring Boot, Tailwind CSS
AI/ML & GenAI: LLM Integration, GenAI, Prompt Engineering, Machine Learning
Data & Analytics: Excel (Data Analysis), Power BI (Dashboards), Data Analysis & Insights
Web Development: Node.js, HTML, CSS
Databases: SQL, MySQL, MongoDB (NoSQL)
Tools: Git, Postman, JWT, REST APIs

PROJECTS

Smart Resume Screener Source Code | [verifycv.vercel.app](#)
JavaScript, Python, React, Node.js, Express.js, MongoDB, Google Gemini API

- Built a full-stack **GenAI** resume screening system (**React, Node.js/Express, Python**) that parses resumes from **4 input formats** (PDF, DOCX, TXT, bulk ZIP) and evaluates candidate-to-job-description fit using the **Google Gemini LLM API**.
- Engineered **parallel multithreaded** evaluation with Python's **ThreadPoolExecutor** for high-throughput ATS-style screening, producing **semantic fit ratings (1–10 scale)**, data-driven **skill-gap analysis**, and AI-generated candidate insights and assessment reports.
- Implemented configurable **Top-N shortlist ranking**, a candidate leaderboard, and one-click **CSV export** for downstream analytics, backed by **MongoDB (Mongoose)** with a JSON fallback datastore.

SecureWipe Source Code
Python, Tkinter, blkdiscard, hdparm, RSA-PSS, ReportLab

- Built a **cross-platform (2 OS: Windows/Linux)** data sanitization tool in **Python** with a **Tkinter** GUI, performing random-pass and zero-pass raw device overwrite modeled on **NIST SP 800-88**; added **3 hardware-accelerated erase paths** on Linux (blkdiscard, NVMe secure format, ATA secure erase).
- Designed a **tamper-evident certification system** generating **RSA-PSS/SHA-256** digitally signed certificates in **2 formats (PDF, JSON)** using cryptography and ReportLab, embedding device metadata, operator details, and a unique verification link per certificate.
- Selected among **250+ teams nationwide** for the **Samartha National Level Hackathon's 36-hour onsite finals**.

Video Streaming Platform Source Code
JavaScript, Node.js, Express, MongoDB, JWT, REST APIs, Postman

- Built a scalable backend using **Node.js, Express, and MongoDB**, with secure **JWT-based authentication** and full video upload/management workflows.
- Implemented **HTTP range-request streaming (206 Partial Content)** for smooth playback of large media files, and optimized **MongoDB queries and schema design** for fast metadata retrieval.

EDUCATION

B.Tech, Computer Science and Engineering (AI/ML) 2023 – 2027
Vellore Institute of Technology, AP CGPA: 8.06
Relevant Coursework: Object Oriented Programming, Databases, Discrete Math, Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning.

CERTIFICATIONS

Google Cloud Certified – Generative AI Leader September 2026
Oracle Certified Foundations Associate – Agentic AI (Oracle University) July 2026

EXTRACURRICULAR & LEADERSHIP

- Samartha National Level Hackathon (36-Hour Onsite)** 24 October 2025
SecureWipe selected for onsite finals
- Google Developer Student Clubs (GDSC), VIT-AP – AI/ML & DA Team** Aug 2024 – Jan 2025
Collaborated with peers on hands-on AI/ML and data analytics team projects.
- ACM Student Chapter, VIT-AP – Project & Research Department** Aug 2024 – Nov 2025
Collaborated with team members on technical projects, communicating progress and solving problems together.
